

RENEWAL WELLNESS™

Pure Ionics Cell Complete is a one of a kind combination of pumpkin proteins, Oceans Pure (*Laminaria digitata*) and desalinated sea water. This product is a trace mineral, vitamin, amino acid, protein, electrolyte, antioxidant and enzyme Power House!

8 drops up to 3 times a day is all you need to:

- Increase alertness
- Improve stamina
- Balance pH
- Remove toxins
- Fight free radicals
- Promote a healthy, balanced thyroid
- Support the Immune System
- Vegan
- Non-GMO

CELL COMPLETE IS NATURALLY IONIC

How does it compare to its market predecessor? It doesn't. It is completely new and completely unique. Per Health Canada regulations, Cell Complete does not contain dissolved oxygen as an added ingredient. But! Both the Oceans Pure concentrate and desalinated sea water contain NATURALLY occurring trace amounts of dissolved oxygen. Mother Nature put it right in there! The motion of the ocean feeds oxygen into the water, which transfers in to the sea bed and plants. Combine that with the trace levels of iron from the Pumpkin Protein that helps to transport oxygen from cell to cell, and you've got a product that is helping to feed oxygen to each and every cell of your body.

The power of Cell Complete is in its ingredients. Pure, high quality, natural sources packed with minerals, vitamins, amino acids, protein, electrolytes, antioxidants and enzymes. Our Oceans Pure kelp is harvested from Nova Scotia, desalinated sea water pulled from Utah's Inland Sea. You simply cannot get a better combination for cellular nutrition than sea based products. They are quite literally jammed full of exactly what each and every cell in our bodies needs to function at their optimum.

Why Pumpkin Protein? Pumpkin is a SUPER FOOD. It contains most of the B Vitamins as well as Vitamins C, D and K. Vitamin D and K are important for maintaining healthy bones and Vitamin K is important in the blood clotting process. Zinc is present in excellent trace levels to help with protein synthesis. Omegas 3,6,9 for memory and learning, cardiovascular and joint health AND maintaining cell integrity. And here are the real kickers: pumpkin protein contains L-tryptophan and an unusual amino acid called cucurbitacin. L-tryptophan is the precursor to serotonin, our "feel good" neurotransmitter, it gives you a sense of well-being and helps fight depression, while also promoting healthy sleep. And cucurbitacin? A big word that does a big job: it paralyzes intestinal parasites and aids in expelling them. Pumpkin protein feeds and protects your cells AND helps them work hard for your health.

In just 8 drops you are getting a strong, pure source of the most essential nutrients your body needs. And because Cell Complete is ionic, the minerals move freely throughout our bodies to our muscles, nerves and brain. And what can it do for you? How about reducing inflammation, reducing high blood pressure and high cholesterol, promoting vascular health and bone strength! The list of benefits goes on and on. When nutrition goes straight to your cells and feeds them what they need, your health improves, your quality of life improves, and your energy to live that life becomes a strong, positive force!

Ingredients: Pumpkin Protein (plant amino acids) 0.5mg, Oceans Pure liquid kelp (*Laminaria digitata*) 0.75mg, desalinated sea water (trace minerals) 0.75mg, per serving.

Non-medicinal Ingredients: Water, natural orange flavor, natural lemon flavor, natural pomegranate flavor, pomegranate fruit powder, B carotene, stevia, potassium sorbate, citric acid.

100% Natural extract: all of the following nutrients are naturally occurring. No artificial or synthesized ingredients are added to Cell Complete. Contains no yeast, dairy, gluten or additives.

Vitamins: Vitamin C, Vitamin K, Vitamin D, Carotene, Biotin, Folic Acid, Niacin, Riboflavin, Thiamin, Tocopherol, Vitamins B2, B5, B6 and B12, Vitamin P, Vitamin E, Vitamin A

Naturally Chelated Minerals: Calcium, Magnesium, Phosphorus, Potassium, Sodium, Zinc

Trace Minerals: Iodine, Boron, Selenium, Calcium, Copper, Cadmium, Iron, Potassium, Magnesium, Manganese, Titanium, Molybdenum, Sodium, Sulphur, Indium, Rhodium, Chromium, Nickel, Thallium, Silicon, Tungsten, Germanium, Zinc

Amino Acids: L-Tryptophan, Threonine, Leucine, Lysine, Arginine, Histidine, Aspartic Acid, Glutamic, Methionine, Valine, Proline, Cystine, Tyrosine, Glycine, Cucurbitacin

Digestive Enzymes: Amylase, Lipase, Cellulase, Protease

Omegas: Omega-3,6,9
