

For Business to Business purposes,
not meant for consumers.

A natural product for healthy blood pressure and cardiovascular health.

The world's first bioactive marine peptides
product clinically proven to lower
blood pressure through its ACE-inhibiting action.

A unique scientific discovery born from the
glacial waters of the Arctic Ocean. Found only
in the shells of the *Pandalus borealis* prawns.

Sustainability

Marealis AS is a certified B Corporation.
B Corps are accelerating a global culture shift
to redefine success in business and build a more
inclusive and sustainable economy.

We are using a historically underutilized by-product to
help solve one of the biggest health issues in the world.

Our Company

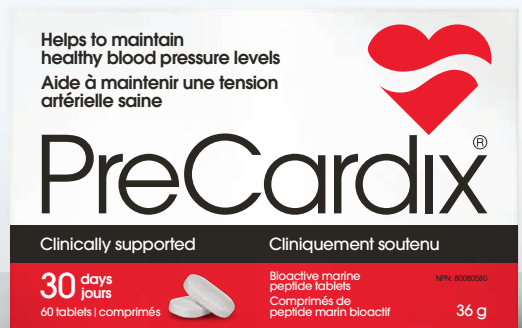

In 1968 Stella Polaris AS (the north star) was founded in the fishing village of Karvikhamm, high within the Arctic circle. Over the next fifty years, this family-run company grew from a small fishing port into a global leader in premium, sustainable cold-water shrimp production. Though environmental stewardship was paramount to the company, the shrimp shells discarded during production resulted in more than 5,000 tons of undesirable waste annually. Upcycling innovation: In 2008, Stella Polaris established Marealis AS, a biotech company committed to converting what was once a waste by-product into potent bioactive marine peptides with significant benefits for blood pressure and cardiovascular health.

In 2017 PreCardix® was approved by Health Canada, and was later introduced to the Canadian marketplace, under the guidance and leadership of a global collective of researchers, business leaders and scientists dedicated to finding a natural, sustainable and effective solution to the growing global blood pressure health crisis.

Clinical Research

PreCardix® is the result of over a decade of research and development, and is a new, unique, and well documented natural health product for healthy blood pressure and cardiovascular health.

- Two clinical studies (2012-2015) have been conducted on the bioactive marine peptides in PreCardix®, derived from hydrolyzed shrimp shells (*Pandalus Borealis*)
- Study population: male & female subjects aged 30-75 with mild to moderate hypertension, unmedicated, without pre-existing medical conditions
 1. Mare-study: pilot clinical trial (74 subjects)
 2. Marealis 13TBHM*: peer-reviewed, double-blind, placebo-controlled, multicentre clinical trial (144 subjects)
- Clinical evidence supported by strong in-market data
- Further clinical studies are ongoing
- \$10 million investment

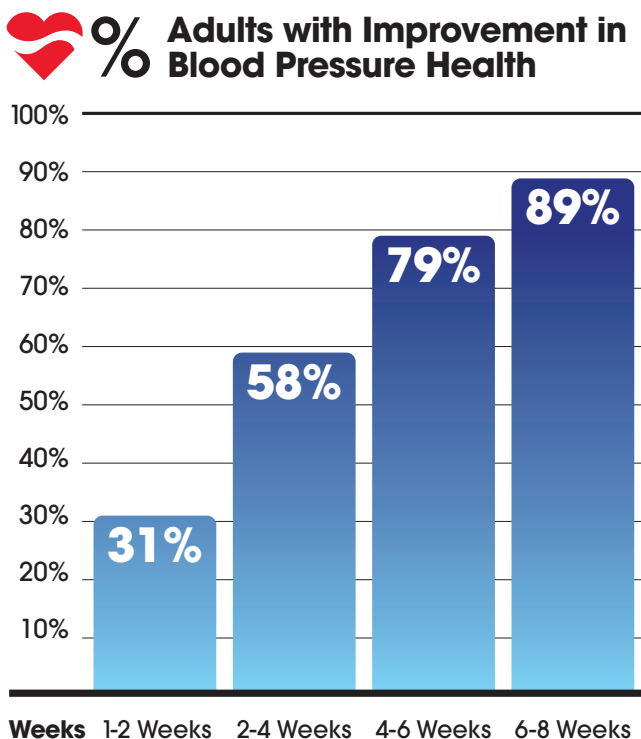

*International Journal of Hypertension, Article ID 2345042

Why PreCardix®?

- Proprietary ingredient, one of a kind product only available through Marealis AS under the PreCardix® brand
- Clinically proven ACE Inhibiting Mechanism of Action (MOA)

ACE inhibitors prevent an enzyme in the body from producing angiotensin II, a substance that narrows blood vessels. This narrowing can cause high blood pressure and forces the heart to work harder. Angiotensin II also releases hormones that raise blood pressure
- The clinical study showed an effect that was comparable to what was found in similar studies including pharmaceuticals
- The therapeutic dosage proven to be clinically effective is used in the product
- Consistent blood pressure-lowering effect: after 8 weeks of taking PreCardix® daily, almost 90% of clinical trial participants saw a blood pressure lowering effect of medicinal significance
- Natural and sustainable; non-GMO and gluten-free ingredients, tested for heavy metal contamination
- PreCardix® comes from a single source that guarantees consistency in its quality; it goes through rigorous rounds of quality testing to meet product quality specifications
- Money Back Guarantee program available for discussion

Results over time

Product details

- NPN # 80080580; Approved by Health Canada, FDA and EFSA
- Non-prescription, no serious side effects
- The average reduction in clinical trial was 6.7 mmHg in systolic BP, 1.7 mmHg in diastolic BP after 8 weeks of treatment. Higher BP readings are likely to show a greater reduction in BP. Individual results may vary.
- Results within 2-8 weeks. Minimum 8 weeks (2 packs) to determine effectiveness
- Dosage: Take 2 tablets together daily before noon, away from meals, medications and supplements. Continue to take daily to maintain results. Measure & monitor blood pressure regularly
- SRP \$49.95 / 30 days, \$1.67 per day
- Developed in Norway. Active ingredient sourced from pristine Arctic Ocean waters
- Made in Canada in a GMP-registered facility

Indication

- Adults seeking to support healthy blood pressure where medication is not yet indicated
- Adults on medication or with pre-existing medical conditions should seek the guidance from a health care provider before initiating PreCardix®
- Contraindications:
 - Age 18 and younger
 - Pregnant or breastfeeding
 - History of angioedema related to the use of ACE inhibiting medication
 - Renal artery stenosis
 - Shellfish allergy

Always consult with your health care provider before making changes to your blood pressure management plan.
